

Geography Key Information:

For our Summer 1 Big Idea, our host subject will be Geography.

We will be following compass directions to help us travel to and carry out fieldwork at Mr Poyner's allotment.

We will also be creating our own sketch maps of the allotment to help us understand where and how things grow on a farm.

Science Key Information:

During this Big Idea, we will also be learning all about how the digestive system works and how our teeth have different functions.

Additionally, we will be learning all about food chains and how these are evident on different farms around the UK.

Art Key Information:

The children will be sketching their very own farms and using watercolours to learn more about complementary and contrasting colours. We will also be moulding our own farm animals out of clay.

Enquiry questions:

What is a farm?
How many farms are there in the UK?
Who lives on a farm?
How do you work on a farm?
What do farms look like in winter?
Can we visit a farm?

Knowledge Vocabulary:

Human Features Physical Features
Food Chain AnimalsFarm

Optional home learning activities:

Week 1: Can you create a simple map? This could be of your house, your local area or your favourite park.

Week 2: Can you think of a couple of questions you would like to ask the farmers at Cannon Hall Farm?

Week 3: Can you sketch your favourite farm yard animal?

Week 4: Can you create a sign for your own farm?

Week 5: Can you build your very own mini farm at home?

Please check our weekly newsletter for any upcoming key dates!
